

Share your views on Science–Art collaboration for Ocean & Water

We need your views!

Dear friends and collaborators,

In the framework of **PartArt4OW (Participatory Art for Society Engagement with Ocean and Water)**, we are gathering insights on how art and science can work together to protect and restore our waters — and we'd love your input!

We are conducting a **short survey** to collect perspectives from artists, scientists, organizations, and other stakeholders to better understand:

- the **challenges** faced by science–art collaborations in ocean and water-related fields,
- how these partnerships can be **strengthened**, and
- what **good practices** can inspire future initiatives.

Take the Survey

Why this matters

Your responses will help us identify how to better support creative collaborations that foster **ocean and water literacy, preservation, and restoration**.

PartArt4OW, funded by the **European Commission (GA 101157247)**, aims to:

- 1 Strengthen the emotional connection between society, the ocean, and inland waters.
- 2 Raise awareness of the environmental challenges affecting aquatic ecosystems.
- 3 Build a transdisciplinary network that drives protection and restoration through creativity.

Join the movement

Thank you in advance for taking a few minutes to share your thoughts — and please feel free to **forward this email** to colleagues, artists, scientists, or networks who may be interested.

Together, we can make waves for our waters 

Warm regards,

The PartArt4OW Team
